SPIKE-BELT

TIRE DEFLATION SYSTEM

SPIKE-BELT

SPIKE-BELT

SPIKE-BELT

Spike-Strip Mfg. manufactures two types of tire deflation systems for use by Law Enforcement. Spike-Belt is a deployment sleeve type system, which self rights for an easy deployment.

All Spike-Belt Systems include a winder, a deployment sleeve and several spikes strips. Also included with each system is training manual.

The Belt allows for the device to collapse and fold up for storage, It has a pocket to store your winder, and a strap to hold it together when stored.

When deployed Spike belt lands, with spikes up, in an extended fashion across the roadway. Spike Belt does not require re-training for officers experienced with deployment sleeve type systems.

The Spike Belt is available in 9 foot and 12 foot models.

The Spike-Belt is attached to a winder with 80 feet of braided cord. The winder allows the officer to adjust and recover the Spike-Belt from a remote location.

WHATS INSIDE

Spike-Belt's Strips are double sided and present Spikes Point up every time.

Each Strip is loaded with double sided hollow Spike's. The Spike provides a controlled deflation. The Strip facilitates easy reload of the Belt by the user for future use

The Spike Belt system is the preferred system for agencies that desire an easy to deploy system.

HOW IT WORKS

Multi-sided systems depend on the road surface to provide compression between the ground spike and the tire.

The compression tilts the strip, and pushes the spike through the tire. The Strip collapses and is damaged.

SPIKE-BELT

Spike-Belts design offers tilt technology . Spikes penetrate straight into the tire.

DEPLOYS from COVER

Notice the Winder is in one hand and the Strip in the other hand. Regardless of the winder you use, Spike belt can be deployed from behind cover.

The Spike-Belt includes 2 or 3 handles for deployment.

LOOP WINDER

The loop winder has a beveled side and allows rope to be released when it is twisted sideways, towards the intended deployment area.

The loop winder style has zero friction for a deployment into far lanes, or across a roadway. officers can move much faster as the cord falls off the edge. Loop winder offers much quicker operation and keeps your eyes off the winder for a better situational awareness.

When the loop is twisted back, it catches the cord and allows you to pull the system in place or retrieve the system from traffic.

CORD REEL

This winder is heavy duty, has a crank and offer a service port. The durability and heavy cord are a superior option to competitive systems that have a history of failures.

The service port allows you to untangle the cord and inspect condition of the cord.

The Spike-Belt winders are a key component for officer safety. The Sleeve, and winder are heavy duty and designed not to fail. Failures of lesser designs, have been behind incidents where officers entered roadway to recover spikes and were hit.

PRODUCT SERVICE

After the system has been used, a new Spike Belt can be built. The sleeve must be opened and inspected for damaged and good sections.

STRIP REPLACEMENT

When the system is hit one or more sections might need to be replaced.

Take out the damaged strip(s) and set them aside. Insert Strips into a new deployment sleeve to build your new Spike Belt.

TRAINING SLEEVE

The old sleeve can serve for a training sleeve. Old Strips can be used as trainers if Spikes are pulled.

WARRANTY

Spike-Belt tire deflation devices are fully warranted to be free of defects in material and workmanship for life, to the original purchaser. Defective parts will be replaced or repaired free of charge.

This limited lifetime warranty also includes free replacement of sections damaged in a pursuit for a period of 4 years. We ask for a case number and date of pursuit and pay a small handling fee. We also offer a lifetime of replacements parts when used in a pursuit for discount off list price. Spike Strip mfg offers free updates on products, when used systems are replaced with the new updates at no charge.

- 360090 9 Foot Spike Belt System with Loop Winder.....\$ 249.95
- 360095 9 Foot Spike Belt System with Cord Reel.....\$299.95
- 360120 12 Foot Spike Belt System with Loop Winder.....\$299.955
- 360125 12 Foot Spike Belt System with Cord Reel.....\$349.95

ACCESSORY AND LIST

The Spike-Strip Spike-Belt 9 foot and 12 models both use the same parts.

CORD-REEL AND LOOP WINDER

- 1602 CORD REEL WINDER 45.00
- 1660 LOOP WINDER 22.00

Replacement parts after 4 year warranty. When used in a pursuit.

- 36500 Deployment sleeve \$25.00
- 39001 Deployment sleeve + Strip \$56.00
- 39002 Deployment sleeve + 2 Strips \$94.00

Warranty replacement discounted of this list price.
